

Audit & Assurance

Audits, reviews and compilations are often a necessary part of doing business. The process can be stressful, however, requiring time and effort from management and staff.

THERE'S A BETTER WAY

For years, we've helped privately held businesses and nonprofit organizations throughout New England complete the audit and review process with less disruption and stress. We do this by focusing on your needs and making the process as efficient as possible.

We also help organizations realize benefits beyond an audit's typically defined purpose. Based on our understanding of your goals, finances, operations, industry and market, we help optimize your business, minimize risk, increase revenues, manage expenditures and improve internal controls.

Clients look to us to help them:

- Implement important accounting pronouncements
- Ensure financial statements are presented in accordance with generally accepted accounting standards or other comprehensive basis of accounting
- Communicate findings and recommendations to the Board of Directors and management
- Make recommendations on internal controls for treasury, accounting and financial reporting
- Improve corporate governance and ensure regulatory compliance
- Analyze impact of new accounting standards
- Implement revenue recognition, consolidations, fair value measurements and other complex accounting standards.

We also provide nonattest services such as financial forecasting, modeling, budgeting and outsourced controller services.
